ABOUT ME

A Software Developer with good knowledge of both frontend and backend development, mainly focused on backend. I have worked on real projects like ERP (Enterprise Resource Planning), Vendor Management System, and an AI-based platform called Digital Parbhani. I enjoy solving problems, working with teams, and building useful software using technologies like Node.js, MySQL, and MongoDB. Always eager to learn and improve my skills.

WORK EXPERIENCE

Backend Developer – The Baap Company Pvt. Ltd.

Location: Sangamner

ERP System :

Developed backend REST APIs for managing the entire admission process including creation, updates, and validations. Integrated with role-based permissions and ensured data security.

Vendor Management System (VMS):

Actively worked on Workflow logic for vendor approvals. Collaborated closely with Business Analysts and Testers to identify bugs, improve filter APIs, and ensure robust flow for status transitions and validations.

Digital Parbhani (AI-Based Platform):

Contributed significantly to the backend of this AI-based application. Implemented APIs for user availability, task creation, and appointment scheduling using Node.js. Handled efficient data provisioning and integration between backend and frontend systems..

EDUCATION

SWAMI MUKTANAND VIDHYALAYA YEOLA.

Completed HSC with 74%. Studied Science and developed time management, discipline, and basic subject knowledge.

UNIVERSITY OF MYSORE

Currently pursuing a Bachelor of Computer Applications BCA-3rd Year while working at The Baap Company.
